

Social activity, transformed into creator income.

An Africa-first social creator-commerce platform where people connect, creators publish and sell digital work, and businesses reach engaged communities.

SUGGESTED SEED ASK

**₦100m–
₦250m**

18 months of focused execution across product polish, creator acquisition, trust and safety, payments, infrastructure, and mobile performance.

THE OPPORTUNITY

A transaction-enabled community platform, not only a social feed.

Tengacion combines social networking, creator discovery, digital content monetization, marketplace transactions, and AI-assisted engagement in one Nigerian-built platform.

- 1 Foreign platforms prioritize global advertising more than local creator payments and direct fan monetization.
- 2 Social selling is fragmented across chats, informal DMs, multiple networks, and disconnected payment flows.
- 3 Emerging creators struggle to earn consistently because discovery, engagement, and payments live in separate products.
- 4 Few credible local platforms combine community, entertainment, creator monetization, and commerce.

Users create attention. Creators convert attention into paid work and fan support. Sellers turn trusted discovery into transactions.

ONE CONNECTED ECONOMIC LOOP

Creator-led growth

Public fan pages, releases, subscriptions, and shareable catalogs pull audiences into the network.

Multiple revenue paths

Creator commissions, marketplace fees, premium tools, promoted posts, sponsorships, and future advertising.

Africa-first execution

Local payment behavior, mobile performance, trust workflows, and culturally relevant discovery shape the product.

THE TENGACION SOLUTION

Discovery, identity, publishing, payments, and commerce in one product.

01**Social network core**

Profiles, feeds, posts, comments, stories, chat, and discovery keep users active.

02**Creator monetization**

Creators upload music, books, and podcasts, sell access, receive support, and build subscriptions.

03**Creator fan pages**

Public pages operate as premium portfolios, storefronts, and social identities.

04**Marketplace commerce**

Approved sellers list products, reach social audiences, accept payments, and manage orders.

05**AI-assisted engagement**

AI can improve onboarding, content discovery, post creation, and creator summaries.

Earn & return**For creators**

Publish multiple formats, consolidate audiences, offer free previews, sell releases, grow fan relationships, and track earnings from one identity.

For fans and buyers

Discover local talent, follow public activity, preview work, purchase securely, and return to a trusted creator or seller page.

A LARGE, UNDER-MONETIZED AUDIENCE

Africa's creator economy is scaling while local monetization gaps remain.

47.8m

Active social media user identities in Nigeria in October 2025.

\$5.10bn

Estimated African creator economy market in 2025.

\$29.84bn

Projected African creator economy market by 2032.

MARKET LAYER	DEFINITION	ESTIMATED SIZE	TENGACION YEAR-3 GOAL
TAM	Global social and creator economy	US\$180bn+ creator economy estimates	Long-term context, not the direct initial target
SAM	African creator economy	US\$5.10bn in 2025; US\$29.84bn projected by 2032	0.02%–0.05% of African creator GMV
SOM	Nigeria social and creator-commerce early adopters	47.8m social user identities	300k–500k MAU; about 0.6%–1.0% of Nigeria social identities

The wedge is creator commerce inside a social app: community activity creates discovery, and discovery can lead directly to paid creator and seller transactions.

WHY TENGACION CAN WIN

DIVERSIFIED BY DESIGN

Near-term transaction revenue, with recurring and advertising upside.

The strongest early revenue comes from creator purchases, subscriptions, and marketplace transactions. Promotion and advertising scale after user activity grows.

CREATOR DIGITAL SALES**40%**

Platform commission on music, books, podcasts, and subscriptions. High-margin digital products with direct fan demand.

MARKETPLACE FEE**₱300**

Per successful purchase. Simple social-commerce monetization as approved seller activity grows.

PROMOTED POSTS**₱2k–₱25k**

Per campaign. Creators and SMEs pay for targeted visibility inside active communities.

PREMIUM CREATOR TOOLS**₱2,500**

Per active creator each month. Recurring SaaS-like revenue for serious creators.

ADS & SPONSORSHIPS**CPM / CPC**

Traffic-scale upside that can be introduced without weakening the core creator-commerce model.

High-margin inventory

The marginal cost of selling an additional digital release is low relative to physical commerce.

Revenue follows activity

Creators, fans, buyers, and sellers create multiple transaction moments across one network.

Reduced ad dependence

Tengacion can build meaningful revenue before a large-scale advertising business is required.

FIVE-YEAR DIRECTIONAL MODEL

Break-even targeted in year 2, with operating leverage from digital commerce.

METRIC	YEAR 1	YEAR 2	YEAR 3	YEAR 4	YEAR 5
Registered users	100,000	350,000	1,000,000	2,500,000	5,000,000
Monthly active users	30,000	120,000	400,000	1,000,000	2,000,000
Active creators	3,000	12,000	40,000	100,000	200,000
Gross merchandise/content value	₦120m	₦600m	₦2.4bn	₦5.5bn	₦9.0bn
Net revenue	₦42m	₦195m	₦720m	₦1.65bn	₦2.70bn
Operating cost	₦60m	₦140m	₦400m	₦850m	₦1.35bn
EBITDA	-₦18m	₦55m	₦320m	₦800m	₦1.35bn
EBITDA margin	-43%	28%	44%	48%	50%
Net revenue in USD	~\$31k	~\$143k	~\$529k	~\$1.21m	~\$1.98m

Year 2

Base-case break-even target as creator and transaction volume compounds.

₦720m

Projected annual net revenue by year 3.

₦320m EBITDA

Year-3 potential if Tengacion captures roughly 0.6%–1.0% of Nigeria’s social identity base as MAU and converts a portion into paid activity.

INVESTMENT ASK AND USE OF FUNDS

Fund 18 months of focused execution toward repeat creator-commerce transactions.

Suggested seed ask

₦100m–₦250m

Final raise size depends on investor appetite and valuation discussion. Capital is intended to improve product quality, strengthen trust and payments, and prove an efficient creator acquisition and transaction loop.

Why now

Nigerian social usage is large, creator monetization remains underdeveloped, and digital payments are increasingly normal in everyday transactions.

Tengacion's differentiated wedge is creator commerce inside a social app, creating several monetization paths from one engaged network.

Capital priorities

Product: mobile polish, fan pages, feed ranking, payments, and AI tools.

Growth: creator onboarding, campuses, communities, and influencer partnerships.

Reliability: storage, API scaling, monitoring, security, and payment reconciliation.

Operations: moderation, support, disputes, compliance, contracts, IP, and financial controls.

NEXT 18 MONTHS

Prove that social engagement converts into repeat commerce at attractive margins.

1 Reach scale

100,000 registered users and 30,000 monthly active users.

2 Activate creators

Onboard 3,000 active creators, including at least 500 monetizing creators.

3 Strengthen public discovery

Expand SEO pages, creator fan-page sharing, and category discovery.

4 Improve payment reliability

Raise payment success rates and strengthen transaction reconciliation.

5 Build trust infrastructure

Deploy moderation, reporting, blocking, and verified creator tools.

6 Secure partnerships

Win the first strategic creator, content, and community partnerships.

Acquisition proof

Measure creator onboarding cost, fan activation, retention, and content supply growth.

Commerce proof

Track conversion, payment success, purchase frequency, GMV, refunds, and contribution margin.

Trust proof

Monitor moderation response, disputes, creator verification, seller quality, and support resolution.

Important notes

1. Financial projections are directional management estimates and have not been audited.
2. Market estimates should be independently verified during investor due diligence.
3. Actual growth, conversion, costs, pricing, and margins will depend on product execution and market conditions.
4. Future planning should be updated with live Tengacion analytics, cohort behavior, payment performance, and creator economics.

Build the platform where African attention becomes sustainable income.

Tengacion brings social connection, creator identity, digital publishing, marketplace discovery, and trusted payments into one Africa-first ecosystem.
