

Social activity, transformed into creator income.

An Africa-first platform for connection, creator publishing, direct sales, and trusted community commerce.

SEED PLAN

NGN 100m–250m

18 months to prove repeat creator-commerce commerce transactions

ONE CONNECTED ECONOMIC LOOP

Tengacion turns community activity into transactions.

Discovery, identity, publishing, payments, and commerce reinforce one another inside a Nigerian-built platform.

WHY IT CAN COMPOUND

**Creators bring audiences. Content and commerce create reasons to return.
Every trusted transaction improves the next discovery and monetization opportunity.**

The wedge is not another feed. It is creator commerce inside a social graph.

THE MONETIZATION GAP

African attention is growing faster than creator income.

Global platforms distribute reach; local creators still need dependable direct payments, storefronts, audience ownership, and business infrastructure.

6 in 10

African creators earn under \$100/month

Africa Creator Economy Report 2026

25%

of surveyed creator income comes from digital products/services

Second-largest reported income source

5.8%

of surveyed creator income comes from ad revenue

Direct monetization matters

Fragmented selling

Discovery happens on one app, sales in DMs, and payment elsewhere.

Weak creator control

Algorithms and ad payouts do not give emerging creators predictable income.

Trust friction

Buyers need verified flows, transparent pricing, support, and dispute handling.

Source: Africa Creator Economy Report 2.0 (2026), reported by Techpoint Africa, 29 Jan 2026.

THE TENGACION SOLUTION

One identity across social, creator, commerce, and AI workflows.

The product foundation is built; the next stage is focused distribution, conversion, and repeat transaction proof.

MARKET SIGNALS

A large digital audience, a fast-growing creator market, and a monetization gap.

DIVERSIFIED BY DESIGN

Transaction revenue first; recurring and media revenue follow.

The sequence is designed to earn from useful creator and marketplace activity before Tengacion depends on scaled advertising.

FIVE-YEAR DIRECTIONAL PLAN

A five-year scale path anchored in active users and creators.

These are directional management targets—not historical traction. Live cohort and transaction data should replace them as Tengacion scales.

CREATOR-LED DISTRIBUTION

Start with creators who already bring a community.

Distribution is designed around credible local clusters, public fan pages, and transactions that can be measured—not undifferentiated paid installs.

1

CREATOR CLUSTERS

Music, books, podcasts, comedy, education, and local commerce.

2

PUBLIC DISCOVERY

Shareable fan pages, SEO surfaces, releases, events, and partner showcases.

3

COMMUNITY ACTIVATION ACTIVATION

Campuses, regional creator leads, associations, and trusted community partners.

4

TRANSACTION RETENTION RETENTION

Previews, purchases, subscriptions, follow-follow-up content, and responsive support.

MEASURE THE LOOP

Creator onboarding cost

Fan activation

Purchase conversion

Repeat purchase

Contribution margin

MILESTONE-GATED EXECUTION

Four proof gates before aggressive scale.

Capital is released against product, acquisition, commerce, and trust evidence—not vanity metrics.

FOUNDER & CEO

Founder-led product vision with Africa-first operating context.

Stephen Daniel Kurah
